Smart Hostel Management System

STATUS: PRODUCTION READY

Comprehensive DBMS Project Development & Progress Report

COURSE / PROJECT	ARCHITECTURE	DATABASE	TEST COVERAGE
DBMS Project 2026	MERN Stack + Vite 8	MongoDB + Mongoose	106 / 106 Tests (100%)

1. Executive Summary

This progress report documents the full end-to-end implementation, stabilization, and database population of the **Smart Hostel Management System**. The project has transitioned from foundational modules into an operational enterprise campus solution capable of managing student accommodations, physical inventory, multi-tiered maintenance complaints, analytical reports, campus notices, and visitor gate passes.

The system features **all 14 official hostels of IIT Guwahati** modeled with authentic campus locations, gender segregation policies, and provisioned bed slots. High-scale resident data (**507 accounts**) was seeded to demonstrate production-scale indexing and query performance. Zero broken links or placeholder screens remain, and all architectural bottlenecks have been resolved.

2. Core Modules Implemented & Tested

🛏️ Module 1: Student Allocation & Vacancies

Database Integrity: Compound partial unique indexes ensure a student or bed cannot have more than one active allocation.

Vacancy Management: Real-time discovery of vacant beds per hostel block and atomic checkout/vacation.

UI Portals: Interactive assignment drawer for administrators & wardens; private allocation card for resident students.

🛠️ Module 2: Grievance & Maintenance Tracking

Full Lifecycle: Supports status transitions: `pending` → `assigned` → `in_progress` → `resolved`.

Categorization & Priority: Covers plumbing, electrical, carpentry, internet, and cleanliness with 4 priority levels.

Role Coordination: Student submission → Warden/Admin staff assignment → Staff task execution & repair notes.

📊 Module 5: Analytics & Aggregations

Occupancy Pipeline: Aggregates live occupancy percentages across all 14 IITG hostels.

Complaint Trends: Quantitative breakdown by category, severity, and resolution times.

Integrity Audits: Automated detection of orphaned bed/room records and capacity-counter mismatches.

📢 Extra Modules: Notices & Gate Passes

Hostel Notice Board: Official campus circulars filterable by general, mess, maintenance, and event notices.

Visitor Log: Campus gate passes tracking entry/exit timestamps, purpose, host student, and 1-click check-out.

Demo Quick-Fills: One-click pill credentials for presentation across Admin, Warden, Staff, and Student.

3. Database Design & DBMS Innovations

🔑 **Partial Unique Indexes (Preventing Double Allocation)**

In `server/src/models/allocation.model.js`, unique partial compound indexes guarantee mathematical integrity:

`{ student: 1 } (unique: true, partialFilterExpression: { status: "active" })`

`{ bed: 1 } (unique: true, partialFilterExpression: { status: "active" })`

Students can have multiple historical allocations over multiple years, but *strictly at most one active bed* at any single moment.

⚡ **Adaptive MongoDB Concurrency (withOptionalTransaction)**

Standard MongoDB standalone instances throw runtime errors when executing multi-document transactions: *"Transaction numbers are only allowed on a replica set member or mongos"*. We engineered a dynamic transaction wrapper in `transaction.js` that verifies replica set capability at runtime: ACID transactions are used if running on a cluster, while standalone servers employ atomic structured rollbacks.

4. IIT Guwahati Campus Hostels Seeded in Database

All 14 official hostels of Indian Institute of Technology Guwahati (IITG) have been registered in the database with their authentic codes, campus locations, gender rules, and provisioned inventory:

#	HOSTEL NAME	CODE	GENDER POLICY	CAMPUS LOCATION	PROVISIONED CAPACITY
1	**Barak Hostel**	`BAR`	Male	North Campus, IIT Guwahati	Rooms 101, 102 (4 beds)
2	**Brahmaputra Hostel**	`BRH`	Male	North Campus, IIT Guwahati	Rooms A-101, A-102 (5 beds)
3	**Dhansiri Hostel**	`DHA`	Female	South Campus, IIT Guwahati	Rooms 101, 102 (4 beds)
4	**Dibang Hostel**	`DIB`	Male	South Campus, IIT Guwahati	Rooms 101, 102 (4 beds)
5	**Dihing Hostel**	`DIH`	Male	South-East Campus, IIT Guwahati	Rooms 101, 102 (4 beds)
6	**Disang Hostel**	`DIS`	Male	East Campus, IIT Guwahati	Rooms B-201, B-202 (5 beds)
7	**Kameng Hostel**	`KAM`	Male	South-West Campus, IIT Guwahati	Rooms 101, 102 (4 beds)
8	**Kapili Hostel**	`KAP`	Male	Central Campus, IIT Guwahati	Rooms C-301, C-302 (3 beds)
9	**Lohit Hostel**	`LOH`	Male	Central Campus, IIT Guwahati	Rooms 101, 102 (4 beds)
10	**Manas Hostel**	`MAN`	Male	West Campus, IIT Guwahati	Rooms 101, 102 (4 beds)
11	**Married Scholars Hostel**	`MSH`	Coed	Residential Area, IIT Guwahati	Flats 101, 102 (4 beds)
12	**Siang Hostel**	`SIA`	Male	North-East Campus, IIT Guwahati	Rooms 101, 102 (4 beds)
13	**Subansiri Hostel**	`SUB`	Female	South Campus, IIT Guwahati	Rooms 101, 102 (4 beds)
14	**Umiam Hostel**	`UMI`	Male	West Campus, IIT Guwahati	Rooms 101, 102 (4 beds)

5. Key Troubleshooting & Security Refactoring

ISSUE IDENTIFIED	ROOT CAUSE DIAGNOSIS	RESOLUTION IMPLEMENTED
Warden Blocked on Complaints & Allocations	`server/src/routes/user.routes.js` had global `authorizeRoles("admin")`. Frontend `Promise.all` calling `/users` failed with 403.	Granted `authorizeRoles("admin", "warden")` to user reads (`GET /users`), allowing wardens to view students and staff without granting account deletion privileges.
"Cannot connect to the server"	Frontend origin mismatch (`127.0.0.1:5173` vs `localhost:5173`) triggered CORS preflight rejections; Express rate limit throttled rapid page refreshes.	Configured dynamic CORS origin resolver for all local variants and raised development rate limiter to 3,000 req/15min.
Dead / Boilerplate Files	Repository contained unused starter assets (`App.css` , `index.css` , `ComingSoonPage.jsx` , `DashboardPage.jsx` , `.DS_Store`).	Purged 25+ dead files; updated client and root READMEs to reflect clean directory structure. Verified 0 empty files across repo.

6. System Metrics & Presentation Credentials

📈 System Metrics

Official Hostels	14 (All IIT Guwahati)
Total Registered Users	507 accounts in MongoDB
Active Rooms & Beds	38 Rooms • 65 Provisioned Beds
Backend Unit/Integ Tests	85 / 85 Passing (node --test)
Frontend Integration Tests	21 / 21 Passing (Vitest)
Vite Production Build	Success (221 ms, 0 errors)

🔑 Demo Credentials for Presentation

ROLE	EMAIL	PASSWORD
👑 **Admin**	`admin@smarthostel.local`	`Admin@123`
🏢 **Warden**	`warden.brahmaputra@smarthostel.local`	`Warden@123`
🛠️ **Staff**	`staff.maint@smarthostel.local`	`Staff@123`
🎓 **Student**	`student.rahul@smarthostel.local`	`StudentPass@123`
